2 DIRECTORY AND PUBLICATION OF CERTIFICATES 24
2.1 CERTIFICATE VALIDATION DIRECTORY 24
2.2 PUBLICATION OF CERTIFICATION INFORMATION 24
2.3 PUBLICATION FREQUENCY 25
2.4 ACCESS CONTROLS FOR CERTIFICATION INFORMATION 25

3 IDENTIFICATION AND AUTHENTICATION 26
3.1 NAMES 26
3.1.1 Names Types 26
3.1.1.1 Registrar Qualified Certification 26
3.1.1.2 Internal Personnel Qualified Certificate 26
3.1.1.3 Qualified Certificate of Legal Person Representative for Electronic Invoicing 27
3.1.1.4 Non-Qualified Certificate for Registration Procedures 28
3.1.1.5 Generic SSL Non-Qualified Certificate 28
3.1.2 Need for names to be meaningful 29
3.1.3 Rules for Interpreting name formats 29
3.1.4 Uniqueness of names 29
3.1.5 Conflict resolution procedure 29
3.1.6 Recognition, authentication and trademarks role 29
3.2 INITIAL IDENTITY VALIDATION 30
3.2.1 Private Key Possession Proof 30
3.2.2 Authentication of Identity for Legal Persons 30
3.2.3 Authentication of Identity for Natural Persons 30
3.2.3.1 Registrar Qualified Certificate 30
3.2.3.2 Internal Personnel 31
3.2.3.3 Qualified Certificate of Legal Person Representative for Electronic Invoicing 32
3.2.4 Authentication of Device Identity 33
3.2.4.1 Non-Qualified Certificate for Registration procedures 33
3.2.4.2 Generic SSL Non-Qualified Certificate 33
3.2.5 Information not verified about the Applicant 33
3.2.6 Representation powers verification 33
3.2.7 Criteria for operating with external CAs 33
3.3 IDENTIFICATION AND AUTHENTICATION FOR RENEWAL REQUESTS 33
3.4 IDENTIFICATION AND AUTHENTICATION FOR REVOKE REQUEST 34

4 OPERATIONAL REQUIREMENTS FOR CERTIFICATES LIFE CYCLE 35

4.1 APPLICATION FOR CERTIFICATES 35
4.1.1 Who can make an application 35
4.1.1.1 Registrar Qualified Certificate 35
4.1.1.2 Internal Personnel Qualified Certificate 35
4.1.1.3 Qualified Certificate of Legal Person Representative for Electronic Invoicing 35
4.1.1.4 Non-Qualified Certificate for Registration Procedures 36
4.1.1.5 Generic SSL Non-Qualified Certificate 36
4.1.2 Registration of requests and applicant’s responsibilities 36

4.2 LICENSE APPLICATION PROCESSING 36
4.2.1 Performing identification and authentication function 36
4.2.2 License application approval or rejection 36
4.2.3 Deadline for license applications processing 36

4.3 CERTIFICATES ISSUANCE 37
4.3.1 CA actions during certificate issuance 37
4.3.2 Issuance notification to the Applicant by CA of certificate 37

4.4 CERTIFICATE ACCEPTANCE 37
4.4.1 Certificate acceptance mechanism 37
4.4.2 Publication of certificate 37
4.4.3 Certificate issuance notification by CA to other authorities 37

4.5 PRIVATE KEY AND CERTIFICATE USE 37
4.5.1 Use of the private key and certificate by the holder 37
4.5.2 Public key and certificate Use by third party acceptors 37

4.6 CERTIFICATE RENEWALS WITHOUT KEY CHANGE 38
4.6.1 Circumstances for renewal of certificates without Key change 38
4.6.2 Who can request renewal of certificate without key change 38
4.6.3 Certificate Renewal Request without key Change Processing 38
4.6.4 Notification of issue of a renewal certificate to holder 38
4.6.5 Acceptance form of certificate without keys change 38
4.6.6 Publication of the certificate without CA change 38
4.6.7 Certificate renewal notification by CA to other authorities 38

4.7 RENEWING CERTIFICATES WITH KEY CHANGES 38
4.7.1 Circumstance for renewal with certificate changing keys 38
4.7.2 Who can request renewal of certificates with change of keys 38
4.7.3 Processing of certificate renewal requests with keys change 39
4.7.4 Notification of renewal of a new certificate to holder 39
4.7.5 Acceptance of certificate with change of key 39
4.7.6 Publication of the certificate with key change by the CA 39
4.7.7 Notification of the renewal of the certificate by CA to other Authorities 39

4.8 CERTIFICATES MODIFICATION 39
4.8.1 Circumstances for certificate modification 39
4.8.2 Who can request certificate modification 39
4.8.3 Processing of certification modification request 39
4.8.4 Notification of the modification of a certificate to the holder 39
4.8.5 Acceptance of the modified certificate 39
4.8.6 Publication of certificate modified by CA 40
4.8.7 Notification of the modification of the certificate by the CA to other Authorities

4.9 Revocation and Suspension of Certificates

4.9.1 Circumstances for revocation

4.9.2 Who can request revocation

4.9.3 Revocation request procedure

4.9.4 Grace Period of the Revocation Request

4.9.5 Term on which the CA must resolve the revocation request

4.9.6 Verification requirement for revocation by trusted third parties

4.9.7 CRL emission Frequency

4.9.8 Maximum time between CRL generation and publication

4.9.9 Availability of online system for verifying certificate status

4.9.10 Online Revocation Checking Requirements

4.9.11 Other forms of disclosure of revocation information available

4.9.12 Special Requirement for Committed Key revocation

4.9.13 Causes for suspension

4.9.14 Who can request suspension

4.9.15 Procedure for requesting suspension

4.9.16 Limits of the suspension period

4.10 Certificate Status Information Services

4.11 Expiry of the Validity of a Certificate

4.12 Custody and Keys Recovery

5 Physical Security Controls, Installations, Management and Operational Controls

5.1 Physical Controls

5.1.1 CORPME Facilities location and physical security measures

5.1.2 Physical access

5.1.3 CORPME Facilities electrical supply and environmental conditioning

5.1.4 Exposure to water

5.1.5 Measures against fires and floods

5.1.6 Storage system

5.1.7 Waste Disposal

5.1.8 Information Backup Policy

5.2 Procedural Controls

5.2.1 Responsible roles for CORPME PKI control and management

5.2.2 Number of persons required per task

5.2.3 Roles requiring segregation of functions

5.3 Personnel Controls

5.3.1 Requirement for professional qualifications, knowledge and experience

5.3.2 Background Check Procedures

5.3.3 Training requirements

5.3.4 Requirements and frequency of training update

5.3.5 Frequency and Rotation Sequence of Tasks

5.3.6 Penalties for unauthorized actions

5.3.7 Requirements for contracting third parties

5.3.8 Documentation provided to staff

5.4 Security Audit Procedures

5.4.1 Registered event types

5.4.2 Frequency of processing audit record
5.4.3 Audit records retention period
5.4.4 Audit records protection
5.4.5 Procedures for supporting audit record
5.4.6 Notification to subject causing the event
5.4.7 Vulnerability Analysis
5.5 ARCHIVING RECORDS
  5.5.1 Archived events types
  5.5.2 Record retention period
  5.5.3 File protection
  5.5.4 File Backup Procedures
  5.5.5 Requirements for time stamping of records
  5.5.6 File information system (internal vs. External)
  5.5.7 Procedures for obtaining and verifying archived information
5.6 CHANGE OF KEYS
5.7 RECOVERY FROM KEY OR CATASTROPHIC COMMITMENT
  5.7.1 Incident and commitment management procedures
  5.7.2 Alteration of hardware, software and / or data resources
  5.7.3 Procedure of action against the commitment of the Authority private key
  5.7.4 Installation after a natural disaster or other catastrophe
5.8 CA OR RA TERMINATION
  5.8.1 CA Termination
  5.8.2 RA Termination
6 TECHNICAL SECURITY CONTROLS
  6.1 GENERATING AND INSTALLING THE KEY PAIR
    6.1.1 Generation of the key pair
    6.1.2 Delivery of private key to holder
    6.1.3 Delivery of public key to certificate issuer
    6.1.4 Delivery of CA public key to trusted third parties
    6.1.5 Key length
    6.1.6 Public Key Generation Parameters and Quality Verification
    6.1.7 Supported Key Usage (X.509 v3 KeyUsage Field)
  6.2 PRIVATE KEY PROTECTION AND ENGINEERING CONTROL FOR MODULES
    6.2.1 Standards for Cryptographic Modules
    6.2.2 Multi – person control (K of N) of the private key
    6.2.3 Private Key Custody
    6.2.4 Private Key Backup
    6.2.5 Archiving the Private Key
    6.2.6 Transferring the Private Key to/from Cryptographic Module
    6.2.7 Storing Private Key in a Cryptographic Module
    6.2.8 Method for activating the private key
    6.2.9 Method for deactivating the private key
    6.2.10 Private Key Destruction Method
    6.2.11 Cryptographic Modules Classification
  6.3 OTHER ASPECTS OF KEY PAIR MANAGEMENT
    6.3.1 Public Key File
    6.3.2 Certificate operative periods and Key Pair usage period
  6.4 ACTIVATION DATA
    6.4.1 Generation and Installation of Activation Data
    6.4.2 Activation data protection
    6.4.3 Other aspects of activation data
  6.5 COMPUTER SECURITY CONTROLS
    6.5.1 Specific technical security requirements
    6.5.2 Computer security assessment
6.6 LIFECYCLE SECURITY CONTROLS

6.6.1 System Development Controls
6.6.2 Security Management Controls
6.6.3 Lifecycle Security Controls

6.7 NETWORK SECURITY CONTROLS

6.8 TIME STAMPING

7 CERTIFICATES, CRL AND OCSP PROFILES

7.1 CERTIFICATE PROFILE

7.1.1 Version Number
7.1.2 Certificate extensions
7.1.2.1 Registrar Qualified Certificate
7.1.2.2 Internal Personnel Qualified Certificate
7.1.2.3 Qualified Certificate of Legal Person Representative for Electronic Invoicing
7.1.2.4 Non-Qualified Certificate for Registration Procedures
7.1.2.5 Generic SSL Non-Qualified Certificate

7.1.3 Object identifiers (OID) of algorithms
7.1.4 Name format
7.1.5 Name Restrictions
7.1.6 Certification Policy Object Identifier (OID)
7.1.7 Using the extension “PolicyConstraints”
7.1.8 “Syntax of the “PolicyQualifier”
7.1.9 Semantic processing for critical extension “Certificate Policy”

7.2 CRL PROFILE

7.2.1 Version Number
7.2.2 CRL and extensions

7.3 OCSP PROFILE

7.3.1 Version Number(s)
7.3.2 OCSP Extension

8 COMPLIANCE AUDITS AND OTHER CONTROLS

8.1 FREQUENCY OR CIRCUMSTANCES OF CONTROLS FOR EACH AUTHORITY
8.2 AUDITOR IDENTIFICATION / QUALIFICATION
8.3 RELATIONSHIP BETWEEN AUDITOR AND AUDITED AUTHORITY
8.4 ASPECTS COVERED BY CONTROLS
8.5 ACTIONS TO BE TAKEN BECAUSE OF DEFICIENCIES DETECTION
8.6 COMMUNICATION OF RESULTS

9 OTHER LEGAL AND ACTIVITY ISSUES

9.1 RATES

9.1.1 Certificate or renewal rates
9.1.2 Certificate access fees
9.1.3 Access fees to the information status or revocation
9.1.4 Other service rates
9.1.5 Refund Policy

9.2 ECONOMIC RESPONSIBILITIES

9.3 CONFIDENTIALITY OF INFORMATION

9.3.1 Confidential information scopes
9.3.2 Non confidential information
9.3.3 Professional Secrecy Duty

9.4 PERSONAL INFORMATION PROTECTION

9.5 INTELLECTUAL PROPERTY RIGHTS

9.6 REPRESENTATION AND WARRANTIES

9.6.1 CA’s Obligations
9.6.2 RA’s Obligations 67
9.6.3 License holders obligation 67
9.6.4 Obligations of third parties who trust or accept certificates 67
9.6.5 Other participant obligations 67
9.7 DISCLAIMER 67
9.8 LIMITATIONS OF RESPONSIBILITIES 67
9.9 INDEMNIFICATION 67
9.10 VALIDITY PERIOD 68
  9.10.1 Time Limit 68
  9.10.2 CP Replacement and repeal 68
  9.10.3 Completion Effects 68
9.11 INDIVIDUAL NOTIFICATIONS AND COMMUNICATIONS WITH PARTICIPANTS 68
9.12 SPECIFICATIONS CHANGES PROCEDURES 68
  9.12.1 Changes Procedures 68
  9.12.2 Circumstances in which OID must be changed 68
9.13 CLAIMS 68
9.14 APPLICABLE REGULATIONS 68
  9.14.1 Compliance with applicable regulations 68
9.15 VARIOUS STIPULATIONS 69
  9.15.1 Full Acceptance Clause 69
  9.15.2 Independence 69
  9.15.3 Judicial resolution 69
9.16 OTHER STIPULATIONS 69
1 INTRODUCTION

1.1 Overview

The Public Corporation of Land and Business Registers of Spain, Colegio de Registradores de la Propiedad y Mercantiles de España (hereinafter CORPME), Public Law Corporation attached to Justice Ministry Registers and Notary General Directorate, is constituted as Electronic Signature Certification Services Provider under the mandate made by the Legislator in the additional provision 26 of Act 24/2001, of December 27th, on Fiscal, Administrative and Social Order Measures. It was born with the purpose of offering the necessary mechanisms and systems to guarantee telematics communications security in which the Registrars, the Public Administrations, the professionals that deal with the Registers and the citizens in general take part.

The TSP CORPME internal regulations are the basic Certification Service standard, which establishes its nature, structure and organization, as well as the criteria and procedures that the Service undertakes to follow in the exercise of its activity, request of the certificates and generation of the keys, until the later emission, distribution, use, revocation and renewal of the same ones.

The Certification Practice Statement (hereinafter CPS), issued in accordance with the Ley 6/2020, de 11 de noviembre, reguladora de determinados aspectos de los servicios electrónicos de confianza, defines and documents a general regulatory framework, according to which the CORPME Certification Service Provider activity in relation to digital certificate life cycle application, emission and management processes including certificates validity, revocation and renewal verification procedures.

The Certification Policies (hereinafter CP’s) applicable to each class of certificate complement the general provisions in the CPS. In case of conflict or contradiction between the provisions of the CPS and the aforementioned Policies, the precepts in the latter will prevail.

The CP’s also define the scope of potential holders of the certificates, as well as the intended uses of the certificates issued by CORPME.

Qualified certificates included in the respective CP’s, comply with EU Qualified Certificates and require the use of a Secure Signature Creation Device.
CORPME's activity will be carried out in full compliance with the requirements of Law 24/2001, of December 27, Ley 6/2020, de 11 de noviembre, reguladora de determinados aspectos de los servicios electrónicos de confianza, all of state level; To EU Regulation 910/2014 on Electronic Identification and Trusted Services, and the PSC Rules of Procedure.

This CP assumes that the reader is familiar with the concepts of PKI, certificate and Electronic Signature; otherwise, it is recommended that the reader is trained in the knowledge of the above concepts before continuing with the reading of this document.

1.2 Document Name and Identification

This document is called CORPME INTERNAL CERTIFICATION POLICIES.

Document Identification:

1.3 Participants in the Public Key Infrastructure (PKI) of the Trust Service Provider of the CORPME

1.3.1 Trust Service Provider (TSP)

The Trust Service provider is the entity responsible for the issuance, under the hierarchy of its root certificate, of the digital certificates for final entities, and for the life cycle management of the digital certificates.

The CORPME Trust Service Provider legal information and identifying data is available at http://pki.registradores.org/normativa/index.htm. A printed copy of such documentation may also be requested by any interested party at the following address:

Colegio de Registradores de la Propiedad y Mercantiles de España

Prestador del Servicio de Certificación del Colegio de Registradores

C/ DIEGO DE LEON, 21.

28006-MADRID

The CORPME is, besides the provider (TSP), the CA (Certification Authority) in accordance with the applicable legislation, Ley 6/2020, de 11 de noviembre, reguladora de determinados aspectos de los servicios electrónicos de confianza and The EU 910/2014 on electronic identification and trust services for electronic transactions in the internal market.
Certification services are, in any case, applied in accordance with the principle of non-discrimination.

The general hierarchical architecture of the CORPME PKI is as follows:

1.3.2 Policy approval authority

The Policy Approval Authority (hereinafter PAA) is the organization responsible for the approval of the CPS and the CP's of CORPME, as well as the approval of the modifications of these documents.

In addition, the PAA is responsible, should it be necessary to evaluate the possibility of an external CA interacting with the CORPME PKI, to determine the adequacy of the CA's CPS to the affected Certification Policy.

The PAA is responsible for analyzing the reports of the audits, whether these are total or partial that are made of the PKI, as well as to determine, if necessary, the corrective actions to be performed.

The PAA will be formed by the Steering Committee, CORPME’s highest governing body, formally defined in the Information Security and Privacy Policy, it is constituted by the following members:

- Member of the CORPME Institutional Relations, acting as Chairman of the Committee who, in case of a tie vote, will have the casting vote.
- The Vice-Dean of the CORPME.
- The Secretary of CORPME.
- Member of the Information Systems Service of the CORPME, acting as Secretary of the Committee.
- Member of Corporate Social Responsibility.
- Member of the Clearing and Settlement Offices and Innovation Service.

The appointment and renewal of its members shall be carried out in accordance with the regulations for the positions associated with them.

Likewise, the members of the Steering Committee may have support roles which are part of this Committee and their role consists on advising this governing body on matters within their competence, being able to propose decisions to be taken, although they do not have an effective vote.
Within the scope of the PAA’s activity, quorum mechanisms will be implemented to guarantee consensus on the decisions to be taken, promoting flexibility in the availability of the different members that formed the PAA. In this sense, the minimum quorum will be two (2) members of the PAA, guaranteeing, in any case, that the Member of the Information Systems Service and the Member of the Settlement and Innovation Offices Service are involved in the decision-making process related to the practices of the TSP.

It is implemented an agile approval process that does not require a formal call for a meeting of the TSP members, but rather a consensual validation process using agile communication methods. Decisions made using the agile approval method will be consolidated at the first PAA meeting, immediately after the agile decision making.

1.3.3 Root Certification Authority

The CORPME issues all the certificates object of the CPS under the hierarchy of the Certificate of the main key, or root certificate. The root certificate is a self-signed certificate, with which the trust chain is started.

Subordinate to the Root, are the hierarchy or secondary key certificates, which will be one for the Internal Certificates and another for the External Certificates.

The holder of the Root Certificate is CORPME itself, and is issued, at the request of the Steering Committee, in accordance with the procedure defined in the PSC Rules of Procedure.

The most relevant information of the CORPME Root Certification Authority is the following:

<table>
<thead>

**Types of certificates issued**

- **Registrar Qualified Certificate** (1.3.6.1.4.1.17276.0.1.1.2): the subscriber represents a natural person associated to a legal person.
- **Internal Personnel Qualified Certificate** (1.3.6.1.4.1.17276.0.1.2.2): the subscriber represents a natural person associated to a legal person.
- **Qualified Certificate of Legal Person Representative for Electronic Invoicing** (1.3.6.1.4.1.17276.0.1.4.1): the subscriber represents a natural person associated to a legal person, representing to this legal person.
- **Non-Qualified Certificate for Registration Procedures** (1.3.6.1.4.1.17276.0.1.3.2).
- **Generic SSL Non-Qualified Certificate** (1.3.6.1.4.1.17276.0.1.6.2).
- **TSA Certificate** (1.3.6.1.4.1.17276.0.1.10.1).

The most relevant information of the subordinate CA for **External Certificates** is the following:

### 1.3.5 Registration Authority

The Registration Authority of CORPME's PSC is formed by its Processing Units, and includes:

- Business Registry.
- Deaneries.
- Land Registry.
- Central Processing Unit.

They draw up the content of the certificates after making the necessary checks and authorize their issuance or revocation. For personal certificates, the Processing Units will generate in a secure device, the key cryptographic pairs for delivery to the Applicants.

All Processing Units will be under the supervision and direction of a registry owner, interim or accidental registrar, except:

- The Deaneries, whose head will be the Territorial Dean, or a registrar assigned by him.
- The Central Processing Unit, which will be responsible for any member of the Governing Board, appointed by the SSI member.
The Central Processing Unit will be in charge of the issuance or revocation of the device certificates (SSL), under request approved according to the procedure of request management and validated this request by the Technical Director of the SSI of CORPME.

All Registry Authorities operate under the supervision and coordination of the Steering Committee and require the prior authorization of the Board of Governors of CORPME, for the issuance of each class of certificates.

The issuance of certain digital certificates of CORPME will be verified, on request of online appointment of the Applicant, in the Internet address https://pki.registradores.org/agenda, in a single appearance, the day and time of your choice in the Processing Unit.

1.3.6 Validation authorities (VA)

The purpose of the Validation Authority (VA) is to facilitate the status of the certificates issued by the CORPME PSC through the Online Certificate Status Protocol (OCSP), which determines the current status of an electronic certificate at the request of an accepting third party without Require access to lists of certificates revoked by them.

This validation mechanism complements the publication of Revoked Certificate Lists (CRLs).

1.3.7 Time Stamping Authorities (TSA)

The Time Stamping Authority (TSA) is responsible for providing the services listed below, in a way that provides confidence to its users: Applicants, subscribers and third-party acceptors.

The services of time stamping are structured in two parts:

- **Provision of time stamps**: the technical and organizational components that issue the time stamps (TST).

- **Time stamps management**: the technical and organizational components that monitor and control the time stamp operation, including temporary synchronization with the UTC reference source.

The TSA is responsible for operating one or more Time Stamping Units (TSUs) which will create and sign the Time Stamps (TST) on behalf of the TSA. The TSA is identified in the electronic signature certificate that is used in the time stamp service.

1.3.8 End entities

Final entities are defined as natural person subjects to human rights, with sufficient capacity to request and obtain a CORPME digital certificate, in its own right or as a representative of a natural person or entity without legal personality. Also considered, as final entities are third parties in good faith who rely on CORPME certificates.

For the above purposes, they will be considered Final Entities:

- Applicant.

- Subscriber.

- Third Party who trusts in CORPME’s certificates.

1.3.8.1 Applicant
When a person is interested in obtaining a certificate issued by CORPME, they should complete the appointment request form of [https://pki.registradores.org/agenda](https://pki.registradores.org/agenda) and acquire the status of a Requester. The mere request for a certificate does not imply the granting of the same, which is subject to the success of registration procedure before the corresponding Processing Unit, after verification of the information corresponding to the certificate that the Applicant provides.

Only senior citizens may request and, where appropriate; obtain digital certificates from CORPME.

### 1.3.8.2 Subscriber

Subscriber, in accordance with the provisions of Ley 6/2020, de 11 de noviembre, reguladora de determinados aspectos de los servicios electrónicos de confianza and regulation EU 910/2014, is the natural person whose identity is linked to a Data of creation and verification of Signature, through a Key Public certified (digitally signed) by the Trust Service Provider. Subscriber identification data is contained in the Subject field of the certificate defined within the ITU X509 standard.

Likewise, the person indicated in the following cases will have the consideration of Subscriber, for the purposes of the Law of Electronic Signature and of regulation EU 910/2014:

- In the case of the issuance of Certificates of Legal Entity Representative, the natural person who, by virtue of a power of attorney registered in the Mercantile Registry bears the representation of a juridical person, including the information of the latter in the certificate.
- In case of the issuance of Certificates of Entity without Legal Personality Representative, the natural person, by virtue of the appointment published in the Official State Gazette, including the data of this in the certificate.
- In the case of those specific profiles of certificates of Legal Entity Representatives issued to natural persons, the natural person who will accredit their capacity for their application and processing in the Central Processing Unit.

The Subscriber identity as the holder of the certificate will appear in the Distinguished Name field of the digital certificate in the CN (Common Name), SN (Serial Number), G (Given Name) and S (Surname) attributes, in the Subject field of the certificate. Subscriber identification data may also be included, depending on the type of certificate, in an extension of subjectAltName, in accordance with what is stipulated in the particular policies applicable to each certificate.

In the cases of representation of Legal Entities or Entities without Legal Personality, the data of the representation will be reflected in the Description attribute of the Distinguished Name field of the digital certificate.

### 1.3.8.3 Third parties that trust CORPME

For the purposes of this CP, Third Party is any user who relies on the certificates issued by the CORPME, and used for the signature of communications, electronic documents, or in the authentication to systems based on digital certificates.

The CORPME does not assume any liability to third parties, even in good faith, who have not applied the due diligence to verify the validity of the Certificates.

### 1.4 Certificate use

#### 1.4.1 Appropriate use of certificates

The certificates regulated by this CP will be used to:
**Authentication and Signature Certificates:** These certificates will be used for the authentication of people in front of the Information Systems of CORPME, the General Administration of the State and other type of Organisms and Entities, as well as for the generation of advanced electronic signatures.

### 1.4.2 Limitations and restriction on certificates use
Any use not included in the previous section is excluded.

### 1.5 Policies Administration

#### 1.5.1 Responsible entity
The Information Systems Service (hereinafter SSI) through its Technical Advisory and Compliance Committee, constituted by:
- The Director of Technology and Systems, who acts as Chairman of the Committee.
- The Director of the Security and Regulatory Compliance Office, who will act as Secretary.
- The Director of Infrastructures, Security Engineering and Communications.
- The Director of Wintel Technology and Virtualization.
- The Director of Operations.
- A Director of Projects and Services, representing the Directors of Projects and Services.

The SSI must establish the terms and wording of the CORPME CPS. In those cases where applicable, in accordance with the TSP internal normative, the Steering Committee shall act by mandate of the CORPME Governance Board, or obtain its authorization in those matters whose competence is reserved to the Registrars governance.

The TSP Director will promote the convening of the Technical Advisory and Compliance Committee to transfer changes to the CPS and CP's of the CORPME's TSP or will be convened by the Committee itself.

The Technical Advisory and Compliance Committee shall carry out at least one annual review of these documents.

#### 1.5.2 Procedure for approval and modification of the Certification Policies
The approval and subsequent modifications of the CP shall be the exclusive responsibility of the Steering Committee, in accordance with the powers delegated by the CORPME Governance Board, in accordance with the TSP internal normative.

Any modifications to this CP will be introduced and published on CORPME’s website ([http://pki.registradores.org/normativa/index.htm](http://pki.registradores.org/normativa/index.htm)). Subscribers, who are dissatisfied with the modifications made, may request the revocation of their digital certificate.

The voluntary revocation by the user that is not in accordance with the provisions incorporated because of this CP will not grant the subscriber any right to be compensated for this reason.

### 1.6 Contact details
For queries or comments related to this CP, the interested party should contact CORPME through any of the following means:
1.7 Definitions and Acronyms

1.7.1 Definitions

**Advanced Electronic Signature**: Electronic Signature establishing the personal identity of the Subscriber with respect to the signed data and verifying its integrity, as it is exclusively linked to both the Subscriber and the referred data, and be created by means that it can maintain under its exclusive control.

**AEPD, Spanish Agency for Data Protection**: Public Law entity, with its own legal personality and full public and private capacity whose purpose is to ensure compliance with legislation on the protection of personal data.

**Applicant**: Natural person who, after identification, requests the issuance of a Certificate.

**Certificate Chain**: Certificates list containing at least one Certificate and the CORPME Root Certificate.

**Certificate Directory**: Information repository following the ITU-T X.500 standard.

**Certificate Revocation Lists or Revoked Certificate Lists (CRLs)**: List including exclusively the revoked or suspended (not expired) certificates relationships.

**Certificate serial number**: Integer and unique value unequivocally associated with a Certificate issued by CORPME.

**Certificate**: Electronic document electronically signed by a Trust Service Provider that links the Subscriber to a Signature Verification Data and confirms its identity. In this CP, where reference is made to a Certificate, it shall be understood as certificate issued by any CORPME Certification Authority.

**Certification Authority**: Natural or legal person that, in accordance with the legislation on Electronic Signature, issues Electronic Certificates, being able to also provide other services in relation to the Electronic Signature.

**Certification Policy (CP)**: Document that completes the Certification Practice Statement, establishing the conditions of use and the procedures followed by CORPME to issue Certificates.

**Certification Practice Statement (CPS)**: Declaration of CORPME available to the public electronically and free of charge as a Trust Service Provider in compliance with the provisions of the Law.

**Cryptographic Card**: A card used by the Subscriber to store private signature and decryption keys, to generate electronic signatures and decrypt data messages. It is considered a Secure Device for the creation of a Firm in accordance with the Law and allows the generation of a qualified Electronic Signature.

**Electronic document**: Set of logical records stored on a media susceptible to be read by electronic data processing equipment, containing information.

**Electronic Signature**: Set of data in electronic format, consigned together, that can be used as a mean of personal identification.
GDPR (General Data Protection Regulation): Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC

Hardware Security Cryptographic Module (HSM): Hardware module used to perform cryptographic functions and storing keys in safe mode.

Hash function: Operation performed on any size data set, so result obtained is another fixed size data set, regardless of the original size, and having the property of being uniquely associated with the initial data, i.e. it is impossible to find two different messages generating the same result when applying the Hash Function.

Hash or Fingerprint: Fixed-size result obtained after applying a hash function to a message fulfilling the property of being uniquely associated with the initial data.

ITU (International Telecommunication Union): International organization of the United Nations system in which governments and the private sector coordinate global telecommunication services and networks.

Key: Sequence of symbols.

OCSP (Online Certificate Status Protocol): Computerized protocol that allows checking the status of a Certificate at the time it is used.

OCSP Request: Request for a Certificate status to OCSP Responder by Following the OCSP Protocol.

OCSP Responder: Computer server that responds, following the OCSP protocol, to the OCSP Requests with the status of the Certificate consulted.

OID (Object Identifier): Value, hierarchical and with a comprehensive a sequence of variable components, consisting of nonnegative integers separated by a point that can be assigned to registered objects and having the property of being unique among the rest of OID.

PIN (Personal Identification Number): Specific number known only by the person who has to access a resource and protected by this mechanism.

PKCS # 10 (Certification Request Syntax Standard): Standard developed by RSA Labs, and internationally accepted, which defines the syntax of a Certificate request.

Policy: For the purposes of the Certification Practice Statement, the Policy is the notarial document that documents the notarial intervention as Registration Authority before the subscriber, as well as his intervention in the case of revocation of the same.

Public Key Infrastructure (PKI): Infrastructure that supports the management of Public Keys for authentication, encryption, integrity, or non-repudiation services.

PUK: (Personal Unblocking Key) Specific number or key only known by the person who has to access a resource that is used to unblock access to that resource.

Qualified Certificate: Certificate issued by a Trust Service Provider complying with the requirements established in the Law in terms of the verification of the identity and other circumstances of the Applicants and the reliability and guarantees of the certification services they provide.

Qualified Electronic Signature: Advanced Electronic Signature based on a qualified Certificate generated by a Secure Signature Creation Device.

**Registration Authority:** Entity who, having an agreement with the CORPME, is in charge of verifying the identity of the Certificates Applicants and Subscribers, and if applicable, also the validity of powers of representatives and subsistence of legal persons or voluntary representatives.

**Responsible for Security:** Person in charge of coordinating and controlling the measures defined by the Security Document regarding the files.

**Responsible for the File (or File Treatment):** Person who decides the purpose, content and use of the file treatment.

**Responsible for Treatment:** Natural or Legal person, public authority, service or any other body treating personal data on behalf of the Person in charge of the processing of the Files.

**Root Certificate:** Certificate whose Subscriber is a Certification Authority belonging to the CORPME hierarchy as Trust Service Provider, and containing the Signature Verification Data of that Authority signed with the Signing Data as the Trust Service Provider.

**Security document:** Document required by the LOPD, whose purpose is to establish the security measures implemented, for the purposes of this document, by CORPME as Trust Service Provider, for the protection of personal data contained in the Activity files containing personal data (hereinafter the Files).

**Signature creation data (Private Key):** Unique data, such as codes or private cryptographic keys, used by the signer to create the Electronic Signature.

**Signature verification data (Public Key):** Data, such as public cryptographic codes or keys, which are used to verify the Electronic Signature.

**Subscriber (or Subject):** The holder or signer of the Certificate. The person whose personal identity is linked to the electronically signed data, through a Public Key certified by the Trust Service Provider. The concept of Subscriber will be referred in the Certificates and in the computer applications related to the issuance as Subject, for strict reasons of international standardization.

**Third parties relying on Certificates:** Those who place their trust in a CORPME Certificate, verifying the validity of the Certificate as described in the CPS.

**Time Stamping:** Confirmation of date and time in an electronic document using cryptographic means based on "Request for comments: 3161 - "Internet X.509 Public Key Infrastructure Time-Stamp Protocol (TSP)"", which manages to date the date and time in an objective manner.

**Trust Service Provider:** Natural or Legal person, who, in accordance with the legislation on Electronic Signature, issues Electronic Certificates, is able to also provide other services in relation to the Electronic Signature. In this CP, it will correspond with the Certification Authorities belonging to the CORPME hierarchy.

**X.509:** Standard developed by the ITU, which defines the basic electronic format for Electronic Certificates.

### 1.7.2 Acronyms

**C:** Country. Distinctive Name (DN) attribute of an object within the X.500 directory structure.

**CA:** Certification Authority.

**CDP:** CRL Distribution Point.

**CN:** Common Name. Distinctive Name (DN) attribute of an object within the X.500 directory structure.
CORPME: The Public Corporation of Land and Business Registers of Spain.

CP: Certificate Policy.

CPS: Certification Practice Statement.

CRL: Certificate Revocation List.

CSR: Certificate Signing Request. A set of data, containing a public key and its Electronic Signature using the associated private key, sent to the Certification Authority for the issuance of an electronic certificate containing such public key.

CWA: CEN Workshop Agreement.

DN: Distinguished Name. Uniquely identifies an entry in an X.500 directory.

HSM: Hardware Security Module. Cryptographic security module used for key storage and safe cryptographic operations.

IANA: Internet Assigned Numbers Authority.

IETF: Internet Engineering Task Force (Internet Standardization Organization).

ITU: International Telecommunication Union.

O: Organization. Distinctive Name (DN) attribute of an object within the X.500 directory structure.

OID: Object Identifier.

OU: Organizational Unit. Distinctive Name (DN) attribute of an object within the X.500 directory structure.

PAA: Policy Approval Authority.

PIN: Personal Identification Number. Password that protects access to a cryptographic device.

PKCS: Public Key Cryptography Standards. PKI standards developed by internationally accepted RSA laboratories.

PKI: Public Key Infrastructure.

PUK: PIN Unlock Key. Password that allows unlocking a cryptographic device blocked by having repeatedly entered a wrong PIN consecutively.

RA: Registration Authority.

RFC: Request for Comments. Standard developed by the IETF.

ROA: Real Observatorio de la Armada Española (Royal Observatory of the Spanish Navy).

SSI: Information Systems Service of the CORPME.

SSL: Secure Sockets Layer.

TSA: Time Stamping Authority.

TSP: Trust Service Provider.

TST: Time Stamp Token.

TSU: Time Stamping Unit.

UTC: Universal Time Coordinated.

VA: Validation Authority.
2 DIRECTORY AND PUBLICATION OF CERTIFICATES

2.1 Certificate validation directory

The CORPME maintains a Certificate Validation Directory permanently available and accessible to all interested parties, in accordance with current regulations. In order to guarantee a continuous and uninterrupted access to the certificate verification service, the Directory server is duplicated and balanced, therefore, in the event of a service failure or fall, the second directory will be immediately posted online, thus guaranteeing itself the availability of the same.

The Certificate Validation Directory is a public directory of inquiry, containing all the CRLs issued by the Trust Service Provider, whose validity period is not expired, including the date and time when revocation took place.

No more limitations on access to the Directory will be established than those imposed for security reasons.

</tr>
</tbody>
</table>

2.2 Publication of certification information

The Directory is published in accordance with the Lightweight Directory Access Protocol (LDAP) standard, and it will include the published ARL, and the published CRLs, following the X.509 standard (Certificate Revocation List, version 2). The Online Certificate Status Protocol (OCSP) can also be used.

The revoked certificate lists will be updated periodically as indicated in section 4.9.7 of this document.
2.3 Publication Frequency
The CPS and the Certification Policies will be published at the time of their creation and will be republished at the time of approval of any changes on them. The modifications will be made public in the Web Directory referenced in section 2.1 of this document.

The CA will add revoked certificates to the relevant CRL within the time stipulated in section 4.9.7 of this document.

2.4 Access Controls for Certification Information
The access for the consultation of the CPS and CP’s is public for all interested parties. The CORPME will have the necessary security measures to prevent unauthorized manipulation of these documents. Those documents will also be digitally signed by a certificate issued by the CORPME to guarantee its integrity.
3 IDENTIFICATION AND AUTHENTICATION

3.1 Names

3.1.1 Names Types
All certificate holders require a distinctive name (*Distinguished Name*) conforming to the X.500 standard.

3.1.1.1 Registrar Qualified Certification
The structure of the certificate, referring to the certificate *Subject* field, is the one described in the following table:

<table>
<thead>
<tr>
<th>Field</th>
<th>Value</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>C</td>
<td>ES</td>
<td>Country.</td>
</tr>
<tr>

<td>NOMBRE NAME SURNAME– NIF NIF</td>
<td>All data must be in UPPERCASE.</td>
</tr>
</tbody>
</table>

3.1.1.2 Internal Personnel Qualified Certificate
The structure of the certificate, referring to the certificate *Subject* field, is the one described in the following table:
### 3.1.1.3 Qualified Certificate of Legal Person Representative for Electronic Invoicing

The structure of the certificate, referring to the certificate Subject field, is the one described in the following table:

<table>
<thead>
<tr>
<th>Campo</th>
<th>Valor</th>
<th>Descripción</th>
</tr>
</thead>
<tbody>
<tr>
<td>C</td>
<td>ES</td>
<td>Country.</td>
</tr>
<tr>
<td>description</td>
<td>Reg: Registro salida CORPME /Fecha: DD-MM-AAAA /Numero: NUM</td>
<td>Official document Codification that accredits the powers of the signer and its registration in the file of the CORPME.</td>
</tr>
<tr>
<td>organizationIdentifier</td>
<td>VATES-NIF</td>
<td>Entity NIF (@signature and Required by ETSI 319 412-2).</td>
</tr>
<tr>
<td>O</td>
<td>BUSINESS NAME</td>
<td>Organization for @firma (Required by ETSI 319 412-2).</td>
</tr>
</tbody>
</table>
3.1.1.4 Non-Qualified Certificate for Registration Procedures

The structure of the certificate, referring to the certificate Subject field, is the one described in the following table:

<table>
<thead>
<tr>
<th>Field</th>
<th>Value</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>C</td>
<td>ES</td>
<td>Country</td>
</tr>
<tr>
<td>organizationIdentifier</td>
<td>VATES-Q2863012G</td>
<td>NIF (Required by ETSI 319 412-2)</td>
</tr>
<tr>
<td>O</td>
<td>Colegio de Registradores de la Propiedad y Mercantiles</td>
<td>Organization</td>
</tr>
<tr>
<td>CN</td>
<td>NAME OF THE REGISTRY or SERVICIO DE SISTEMAS DE INFORMACION</td>
<td>Registry holding the certificate or Servicio de Sistemas de Informacion. All data must be in UPPERCASE.</td>
</tr>
</tbody>
</table>

3.1.1.5 Generic SSL Non-Qualified Certificate

The structure of the certificate, referring to the certificate Subject field, is the one described in the following table:

<table>
<thead>
<tr>
<th>Field</th>
<th>Value</th>
<th>Description</th>
</tr>
</thead>
</table>
3.1.2 Need for names to be meaningful

In all cases, the distinctive certificate holder’s names must be significant, in accordance with the rules imposed in previous section.

3.1.3 Rules for Interpreting name formats

The rule used by the CORPME TSP to interpret the distinguished names of the certificate holders is ISO / IEC 9595 (X.500) Distinguished Name (DN).

3.1.4 Uniqueness of names

The Distinguished Name set and the contents of Policy Identifier extension must be unique and unambiguous.

- For Registrar Qualified Certificates, the name use (composed of surnames and the name), and of NIF in CN guarantees the uniqueness of the same.
- For Internal Personnel Qualified Certificates, the name use (composed of surnames and name), and NIF in CN guarantees the uniqueness of the same.
- Non-Qualified Certificate for Registration Procedures, the name use of the registry holder of the certificate or Servicio de Sistemas de Informacion in CN, guarantees the uniqueness of the same.
- For Generic SSL Non-Qualified Certificate, the use of the machine name in CN, guarantees the uniqueness of the same.
- Qualified Certificates of Legal Person Representative for Electronic Invoicing, the entity use (composed of the company name), the NIF, the name (composed of surnames and name), and the NIF in CN guarantees the uniqueness of the same.

3.1.5 Conflict resolution procedure

Any dispute concerning names ownership shall be solved as set forth in paragraph 9.13 of this document.

3.1.6 Recognition, authentication and trademarks role

Not stipulated.
3.2 Initial identity validation

3.2.1 Private Key Possession Proof

The private keys of the following internal certificates,
- Registrar Qualified Certificate.
- Internal Personnel Qualified Certificate.
- Qualified Certificate of Legal Person Representative for Electronic Invoicing.

will be generated by Applicant's secure cryptographic device in his custody. Within these devices, both the key generation and the signature cryptographic operations will be carried out, directly and immediately. Thus, in no case will be necessary to transfer the private key to an external device, guaranteeing the subscriber his / her absolute control over the signature creation data, and, therefore, the impossibility of impersonation of his / her electronic signature. The order for generating the keys and the introduction of the passwords in the cryptographic device will be carried out personally by the certificate holder.

For Generic SSL Non-Qualified Certificates, the CORPME will verify that the requester has the private key corresponding to the public key related to the requested Certificate.

For Non-Qualified Certificates for Registration Procedures, the CORPME will verify by means of the receipt of the license of use signed by the corresponding Registry holder, that the Applicant has the private key corresponding to the public key related to the requested Certificate.

Being necessary to guarantee the continuity of registry services, CORPME with the assistance of the Central UT may issue ex officio the Non-Qualified Certificate for Registry Procedures, without prejudice to the responsibilities that this entails for the Registry in question. If the certificate has been issued and 7 business days have elapsed, the installation process has not been started by the registry, the Central Processing Unit and the technical services of CORPME may initiate it in those elements that are critical for the maintenance of the service of the public registry service. This situation will be regularized by means of due actions that guarantee the recognition of responsibilities by those responsible for the Registry.

3.2.2 Authentication of Identity for Legal Persons

The national applicants for CORPME's Certificates must appear before the Processing Unit of their choice, with their NIF.

Foreign applicants for CORPMES's Certificates, must present, with their foreign identification number (NIE) and their passport, or their residence card or any other legal document of identification bearing an image of the applicant's face.

Besides the applicant identification by checking the above mentioned documentation, the corresponding Processing Unit Responsible must request the documentation proving the certifiable attribute depending on the type of certificate.

3.2.3 Authentication of Identity for Natural Persons

The Applicant must provide the following information, depending on certificate requested:

3.2.3.1 Registrar Qualified Certificate
- Name of the Registry (registry in which the certificate holder exercises his or her function).
- Subscriber's name and surname.
- Identity document (DNI / NIF) of the subscriber.
- Email.
- Phone number.
- Postal address (optional).
- Windows Primary Name (UPN).
- Position.
  - Active Registrar
    - Certificate issued online or electronic record confirming the corresponding position.

3.2.3.2 Internal Personnel

- Name of the Registry or Destination Unit
  - In the case of Registrar employees: Registrar in which the holder of the certificate exercises its function.
  - In the case of Deanships and Deanery employees: Deanery in which the holder of the certificate exercises its function.
  - In the case of CORPME employees, positions of the CORPME, positions of the CORPME Governance board, aspirant Registrars, retired Registrars, Registrar on voluntary leave and employees of CORPME related associations, personnel of external organizations providing services to CORPME: CORPME.

- Subscriber's name and surname.
- Identification document of the subscriber.
  - In case of positions of CORPME Governance Board, aspirant registrars retired Registrars, Registrar on voluntary leave: DNI / NIF.
  - In the case of CORPME employees, registrar employees, deanery employees, positions of the CORPME and employees of associations related to the CORPME, personnel of external organizations providing services to CORPME: DNI / NIF o NIE. In the last case, the employees must present their passport, or their residence card or any other legal document of identification bearing an image of the applicant's face.

- Email.
- Phone number.
- Postal address (optional).
- Windows Primary Name (UPN).
- Subtype: College, Register, Organization (associations related to the CORPME), aspirant registrars, retired registrars, Registrar on voluntary leave, personnel of external organizations providing services to CORPME.

- Business Name (if applicable).
- Position.
  - CORPME employee.
• Declaration of Responsibility issued by the Vice-Dean or CORPME’s Human Resources Director, or authorized delegate confirming the position.
  o Employee of Land or Business Registry.
    • Declaration of Responsibility issued by the Registrar confirming the position.
  o Deanships:
    • Responsible statement issued by the Secretary of the Deanery’s Office confirming the corresponding position. In the case of the position of Secretary, the responsible statement will be issued by the Dean.
  o Deanery Employee:
    • Responsible statement issued by the Dean confirming the position.
  o Position of the CORPME Governance board.
    • Declaration of Responsibility issued by the CORPME Secretary confirming the position.
  o Aspirant registrar.
    • Certificate issued online or by the CORPME Secretary confirming the position.
  o Retired Registrar.
    • Certificate issued online or by the CORPME Secretary confirming the position.
  o Registrar on Voluntary leave.
    • Certificate issued online or by the CORPME Secretary confirming the position.
  o Personnel of external organizations providing services to CORPME.
    • Certificate from the external organization specifying the personnel identity and their assignment to services provided to CORPME TSP. This certificate will be provided by CORPME SSI Chief Financial Officer, as responsible of third parties agreements.

3.2.3.3 Qualified Certificate of Legal Person Representative for Electronic Invoicing

➢ Subscriber's name and surname.
➢ Subscriber’s Identity document (DNI / NIF).
➢ Email.
➢ Phone number.
➢ Postal address (optional).
➢ Business name.
➢ CORPME NIF.
➢ Position.
  o CORPME Dean-President.
• Declaration of Responsibility issued by the CORPME Secretary confirming the position and,
• Copy of CORPME Log out record with official notification to the Head of the Registrars and Notary of the Dean-President nomination.

➤ Issue number.
➤ Issue date of the document.

3.2.4 Authentication of Device Identity

3.2.4.1 Non-Qualified Certificate for Registration procedures

➤ Name of Registry holding the certificate.
➤ Email (optional).
➤ Postal address.
➤ Operator.

3.2.4.2 Generic SSL Non-Qualified Certificate

➤ Machine Names or DNS Names.
➤ Email.

3.2.5 Information not verified about the Applicant

All information presented by an Applicant is verified before the certificate issuance.

3.2.6 Representation powers verification

Besides the Applicant identification by checking the above mentioned documentation, the corresponding Processing Unit Responsible must request the documentation proving the certifiable attribute depending on the type of certificate.

The Processing Unit will verify the equivalence of the certification in the terms of the certificate, as well as the exact correlation between the validity periods of the registered attribute and the certificate. If an inaccuracy is detected, it will revoke the certificate within this period, notifying the holder of this fact.

3.2.7 Criteria for operating with external CAs

As specified in the CORPME Certification Practice Statement (CPS).

3.3 Identification and authentication for renewal requests

The Holders identification and authentication for the renewal requests are specified in section 4.7 of this document.
3.4 Identification and authentication for revocation request

The holders’ identification and authentication the revocation requests are specified in section 4.9 of this document.
4 OPERATIONAL REQUIREMENTS FOR CERTIFICATES LIFE CYCLE

4.1 Application for certificates

4.1.1 Who can make an application

The request will vary according to the type of Qualified Certificate requested.
For request of some of the certificates issued by CORPME, a prior appointment may be required.

4.1.1.1 Registrar Qualified Certificate

Active Registrars may make the request for this type of certificate.
The request process does not require a prior appointment. The request will be made by the creation of a fake appointment to request and validate the user's data and proceed to invoke the issuance of the certificate.

Users requesting qualified certificates will be issued with a corresponding identification document and a certificate accrediting the position, and for applications for unqualified certificates, the request will be sent by e-mail, and will be issued by the Central Processing Unit of the CORPME.

4.1.1.2 Internal Personnel Qualified Certificate

The request for this type of certificate may be made by CORPME employees, Registry employees, Deanships, Deanery employees, and positions of the CORPME, positions of the CORPME Governance Board, aspirant Registrars, retired Registrars, Registrars on voluntary leave and employees of CORPME related associations, personnel of external organizations providing services to CORPME.
The request process does not require a prior appointment. The request will be made by the creation of a fake appointment to request and validate the user's data and proceed to invoke the issuance of the certificate.

Users requesting qualified certificates will be issued with a corresponding identification document and a certificate accrediting the position, and for applications for unqualified certificates, the request will be sent by e-mail, and will be issued by the Central Processing Unit of the CORPME.

4.1.1.3 Qualified Certificate of Legal Person Representative for Electronic Invoicing

The request for this type of certificate may be made by the Dean-President of the Registrar's Association.
The request process does not require a prior appointment. The request will be made by the creation of a fake appointment to request and validate the user's data and proceed to invoke the issuance of the certificate.

Users requesting qualified certificates will be issued with a corresponding identification document and a certificate accrediting the position, and for applications for unqualified certificates, the request will be sent by e-mail, and will be issued by the Central Processing Unit of the CORPME.
4.1.1.4 Non-Qualified Certificate for Registration Procedures

Certificates Not Qualified for Registration Procedures will be issued from Central Processing Unit. Certificate issuance batches will be generated and once generated, a script will be executed to change the PKCS #12 password with a unique random password for each one.

From CORPME core services, the certificates will be installed on the integration servers of each registry and once the operation is completed, the PKCS #12 password will be notified to the registry security manager so that they can be installed in the registry servers. Registry clients.

After the period of one week will proceed to the revocation of the certificates that have been renewed.

The Central Processing Unit, once the certificates have been installed, will erase any references to these and their respective passwords, to ensure non-repudiation.

4.1.1.5 Generic SSL Non-Qualified Certificate

For Generic SSL Non-Qualified Certificates issuance, a request must be sent through the corporate email to the CORPME Central Processing Unit.

The Central Processing Unit will proceed to process the request, validating this request the Technical Director of the SSI and checking if there is another certificate of the same class and with same holder name. If so, proceed to deny the request. Finally, the Central Processing Unit will notify the Applicant the approval or the denial of the request.

In case the request is positive, the issued certificate will be provided, and a license will be sent twice in electronic format, both signed by the Applicant and returned by one of the copies. An application and license copy shall remain in the holder possession and the other shall be filed in the Central Processing Unit, for a period of fifteen (15) years.

4.1.2 Registration of requests and applicant’s responsibilities

As specified in CORPME Certification Practice Statement (CPS).

4.2 License Applications Processing

4.2.1 Performing identification and authentication function

As specified in CORPME Certification Practice Statement (CPS).

4.2.2 License application approval or rejection

As specified in CORPME Certification Practice Statement (CPS).

4.2.3 Deadline for license applications processing

As specified in CORPME Certification Practice Statement (CPS).
4.3 Certificates Issuance

4.3.1 CA actions during certificate issuance
As specified in CORPME Certification Practice Statement (CPS).

4.3.2 Issuance notification to the Applicant by CA of certificate
As specified in CORPME Certification Practice Statement (CPS).

4.4 Certificate acceptance

4.4.1 Certificate acceptance mechanism
As specified in CORPME Certification Practice Statement (CPS).

4.4.2 Publication of certificate
As specified in CORPME Certification Practice Statement (CPS).

4.4.3 Certificate issuance notification by CA to other authorities
As specified in CORPME Certification Practice Statement (CPS).

4.5 Private Key and certificate use
As specified in CORPME Certification Practice Statement (CPS).

4.5.1 Use of the private key and certificate by the holder
The applicant must sign the license to use the certificate, accepting it and this PC. The license will necessarily include the following contents:

- **The personal data of the holder**: name and surname, telephone and e-mail address.
- **A declaration by the holder** that, if applicable, he has received the cryptographic device containing the private key and the certificate and in which he undertakes to use it in accordance with the provisions of the CPD, the internal regulations of the PSC and this PC.
- **The applicant's consent** to the transfer of his/her personal data to the CORPME insofar as they are necessary for the CORPME to provide certification services. These data will be kept confidential at the CORPME, and will never be transferred to third parties.

4.5.2 Public key and certificate Use by third party acceptors
As specified in CORPME Certification Practice Statement (CPS).
4.6 Certificate Renewals without Key Change

4.6.1 Circumstances for renewal of certificates without Key change
Not stipulated.

4.6.2 Who can request renewal of certificate without key change
Not stipulated.

4.6.3 Certificate Renewal Request without key Change Processing
Not stipulated.

4.6.4 Notification of issue of a renewal certificate to holder
Not stipulated.

4.6.5 Acceptance form of certificate without keys change
Not stipulated.

4.6.6 Publication of the certificate without CA change
Not stipulated.

4.6.7 Certificate renewal notification by CA to other authorities
Not stipulated.

4.7 Renewing certificates with key changes
As specified in CORPME Certification Practice Statement (CPS).

4.7.1 Circumstance for renewal with certificate changing keys
As specified in CORPME Certification Practice Statement (CPS).

4.7.2 Who can request renewal of certificates with change of keys
As specified in CORPME Certification Practice Statement (CPS).
4.7.3 Processing of certificate renewal requests with keys change
As specified in CORPME Certification Practice Statement (CPS).

4.7.4 Notification of renewal of a new certificate to holder
As specified in CORPME Certification Practice Statement (CPS).

4.7.5 Acceptance of certificate with change of key
As specified in CORPME Certification Practice Statement (CPS).

4.7.6 Publication of the certificate with key change by the CA
As specified in CORPME Certification Practice Statement (CPS).

4.7.7 Notification of the renewal of the certificate by CA to other Authorities
As specified in CORPME Certification Practice Statement (CPS).

4.8 Certificates modification
As specified in CORPME Certification Practice Statement (CPS).

4.8.1 Circumstances for certificate modification
Not stipulated.

4.8.2 Who can request certificate modification
Not stipulated.

4.8.3 Processing of certification modification request
Not stipulated.

4.8.4 Notification of the modification of a certificate to the holder
Not stipulated.

4.8.5 Acceptance of the modified certificate
Not stipulated.
4.8.6 Publication of certificate modified by CA
Not stipulated.

4.8.7 Notification of the modification of the certificate by the CA to other Authorities
Not stipulated.

4.9 Revocation and suspension of certificates

4.9.1 Circumstances for revocation
As specified in CORPME Certification Practice Statement (CPS).

4.9.2 Who can request revocation
As specified in CORPME Certification Practice Statement (CPS).

4.9.3 Revocation request procedure
As specified in CORPME Certification Practice Statement (CPS).

4.9.4 Grace Period of the Revocation Request
As specified in CORPME Certification Practice Statement (CPS).

4.9.5 Term on which the CA must resolve the revocation request
As specified in CORPME Certification Practice Statement (CPS).

4.9.6 Verification requirement for revocation by trusted third parties
As specified in CORPME Certification Practice Statement (CPS).

4.9.7 CRL emission Frequency
As specified in CORPME Certification Practice Statement (CPS).

4.9.8 Maximum time between CRL generation and publication
As specified in CORPME Certification Practice Statement (CPS).
4.9.9 Availability of online system for verifying certificate status

In addition to the publication of the CRLs, CORPME has an OCSP certificate validation service, which implements the "RFC6960 - X.509 Internet Public Key Infrastructure Online Certificate Status Protocol", in which the revocation status of a certain certificate issued by the TSP of CORPME. The access URL is published in the CORPME Certification Practice Statement (CPS).

4.9.10 Online Revocation Checking Requirements
As specified in CORPME Certification Practice Statement (CPS).

4.9.11 Other forms of disclosure of revocation information available
As specified in CORPME Certification Practice Statement (CPS).

4.9.12 Special Requirement for Committed Key revocation
As specified in CORPME Certification Practice Statement (CPS).

4.9.13 Causes for suspension
As specified in CORPME Certification Practice Statement (CPS).

4.9.14 Who can request suspension
As specified in CORPME Certification Practice Statement (CPS).

4.9.15 Procedure for requesting suspension
As specified in CORPME Certification Practice Statement (CPS).

4.9.16 Limits of the suspension period
As specified in CORPME Certification Practice Statement (CPS).

4.10 Certificate status Information Services

4.10.1 Operating characteristics
As specified in CORPME Certification Practice Statement (CPS).

4.10.2 Service Availability
As specified in CORPME Certification Practice Statement (CPS).
4.10.3 Additional Features
As specified in CORPME Certification Practice Statement (CPS).

4.11 Expiry of the validity of a certificate
As specified in CORPME Certification Practice Statement (CPS).

4.12 Custody and keys recovery

4.12.1 Custody and recovery policies and practices
Not stipulated.

4.12.2 Session Key protection and recovery Policies and Practices
Not stipulated.
5 PHYSICAL SECURITY CONTROLS, INSTALLATIONS, MANAGEMENT AND OPERATIONAL CONTROLS

5.1 Physical controls
As specified in CORPME Certification Practice Statement (CPS).

5.1.1 CORPME Facilities location and physical security measures
As specified in CORPME Certification Practice Statement (CPS).

5.1.2 Physical access
As specified in CORPME Certification Practice Statement (CPS).

5.1.3 CORPME Facilities electrical supply and environmental conditioning
As specified in CORPME Certification Practice Statement (CPS).

5.1.4 Exposure to water
As specified in CORPME Certification Practice Statement (CPS).

5.1.5 Measures against fires and floods
As specified in CORPME Certification Practice Statement (CPS).

5.1.6 Storage system
As specified in CORPME Certification Practice Statement (CPS).

5.1.7 Waste Disposal
As specified in CORPME Certification Practice Statement (CPS).

5.1.8 Information Backup Policy
As specified in CORPME Certification Practice Statement (CPS).

5.2 Procedural controls
As specified in CORPME Certification Practice Statement (CPS).
5.2.1 Responsible roles for CORPME PKI control and management
As specified in CORPME Certification Practice Statement (CPS).

5.2.2 Number of persons required per task
As specified in CORPME Certification Practice Statement (CPS).

5.2.3 Roles requiring segregation of functions
As specified in CORPME Certification Practice Statement (CPS).

5.3 Personnel controls
As specified in CORPME Certification Practice Statement (CPS).

5.3.1 Requirement for professional qualifications, knowledge and experience
As specified in CORPME Certification Practice Statement (CPS).

5.3.2 Background Check Procedures
As specified in CORPME Certification Practice Statement (CPS).

5.3.3 Training requirements
As specified in CORPME Certification Practice Statement (CPS).

5.3.4 Requirements and frequency of training update
As specified in CORPME Certification Practice Statement (CPS).

5.3.5 Frequency and Rotation Sequence of Tasks
As specified in CORPME Certification Practice Statement (CPS).

5.3.6 Penalties for unauthorized actions
As specified in CORPME Certification Practice Statement (CPS).

5.3.7 Requirements for contracting third parties
As specified in CORPME Certification Practice Statement (CPS).
5.3.8 Documentation provided to staff
As specified in CORPME Certification Practice Statement (CPS).

5.4 Security Audit Procedures
As specified in CORPME Certification Practice Statement (CPS).

5.4.1 Registered event types
As specified in CORPME Certification Practice Statement (CPS).

5.4.2 Frequency of processing audit record
As specified in CORPME Certification Practice Statement (CPS).

5.4.3 Audit records retention period
As specified in CORPME Certification Practice Statement (CPS).

5.4.4 Audit records protection
As specified in CORPME Certification Practice Statement (CPS).

5.4.5 Procedures for supporting audit record
As specified in CORPME Certification Practice Statement (CPS).

5.4.6 Notification to subject causing the event
As specified in CORPME Certification Practice Statement (CPS).

5.4.7 Vulnerability Analysis
As specified in CORPME Certification Practice Statement (CPS).

5.5 Archiving records
As specified in CORPME Certification Practice Statement (CPS).

5.5.1 Archived events types
As specified in CORPME Certification Practice Statement (CPS).

5.5.2 Record retention period
As specified in CORPME Certification Practice Statement (CPS).

5.5.3 File protection
As specified in CORPME Certification Practice Statement (CPS).

5.5.4 File Backup Procedures
As specified in CORPME Certification Practice Statement (CPS).

5.5.5 Requirements for time stamping of records
As specified in CORPME Certification Practice Statement (CPS).

5.5.6 File information system (internal vs. External)
As specified in CORPME Certification Practice Statement (CPS).

5.5.7 Procedures for obtaining and verifying archived information
As specified in CORPME Certification Practice Statement (CPS).

5.6 Change of keys
As specified in CORPME Certification Practice Statement (CPS).

5.7 Recovery from key or catastrophic commitment
As specified in CORPME Certification Practice Statement (CPS).

5.7.1 Incident and commitment management procedures
As specified in CORPME Certification Practice Statement (CPS).

5.7.2 Alteration of hardware, software and / or data resources
As specified in CORPME Certification Practice Statement (CPS).

5.7.3 Procedure of action against the commitment of the Authority private key
As specified in CORPME Certification Practice Statement (CPS).

5.7.4 Installation after a natural disaster or other catastrophe
As specified in CORPME Certification Practice Statement (CPS).

5.8 CA or RA Termination
As specified in CORPME Certification Practice Statement (CPS).

5.8.1 CA Termination
As specified in CORPME Certification Practice Statement (CPS).

5.8.2 RA Termination
As specified in CORPME Certification Practice Statement (CPS).
6 TECHNICAL SECURITY CONTROLS

6.1 Generating and installing the key pair

6.1.1 Generation of the key pair
Subscriber keys, which will have a length of 2048 bits for all certificates.
Qualified Certificates (Registrars, Internal Personnel and Legal Person Representative for Electronic Invoicing) are always generated during the appearance of the Applicant and with their personal intervention in the process of assigning keys.
For Non-Qualified Certificates (Registration Procedures and SSL) the personal appearance of the Applicant is not necessary and the keys will be generated in the device and a request for a certificate that will be provided to the Central Processing Unit.

6.1.2 Delivery of private key to holder
As specified in CORPME Certification Practice Statement (CPS).

6.1.3 Delivery of public key to certificate issuer
As specified in CORPME Certification Practice Statement (CPS).

6.1.4 Delivery of CA public key to trusted third parties
The CORPME TSP CAs public key is available to third parties who rely on the CORPME web directory, defined in section 2.1 of this CP.

6.1.5 Key length
The key length of the CA Internal Certificates is 4096 bits.

6.1.6 Public Key Generation Parameters and Quality Verification
The public key of the internal certificates is encoded in accordance with RFC 5280 and RFC 3279.

6.1.7 Supported Key Usage (X.509 v3 KeyUsage Field)
The supported key uses for the internal certificates are given by the value of Key Usage and Extended Key Usage extensions. The contents of these extensions for each of internal certificate types can be consulted in section 7.1.2 of this document.

6.2 Private key protection and engineering control for modules

6.2.1 Standards for Cryptographic Modules
The modules used for the key creation used by CORPME TSP CAs comply with the FIPS 140-2 level 3 certification.

6.2.2 Multi – person control (K of N) of the private key
The external certificates private keys are not under multi-person control. The control of said private key falls entirely on subscriber.

6.2.3 Private Key Custody
The owners themselves carry out external certificate private keys custody.

6.2.4 Private Key Backup
In no case will the private signing external certificates keys be backed up to guarantee non-repudiation.

6.2.5 Archiving the Private Key
External certificates Private signing keys will never be archived to ensure non-repudiation.

6.2.6 Transferring the Private Key to/or from Cryptographic Module
In no case is it possible to transfer external certificates’ private signing keys to ensure non-repudiation.

6.2.7 Storing Private Key in a Cryptographic Module
Private signing keys for external certificates are generated on cryptographic device at the time of certificate generation.

6.2.8 Method for activating the private key
The owner of the same can do Private Key activation by using your PIN.

6.2.9 Method for deactivating the private key
Not stipulated.

6.2.10 Private Key Destruction Method
Not stipulated.

6.2.11 Cryptographic Modules Classification
The cryptographic modules used meet the FIPS 140-2 level 3 standard.
6.3 Other aspects of Key Pair management

6.3.1 Public Key File
As specified in CORPME Certification Practice Statement (CPS).

6.3.2 Certificate operative periods and Key Pair usage period
The validity period of internal certificates is two (2) years from the time of certificate issuance, except for SSL certificates, which will be at the request of the Applicant between a minimum validity of one (1) year and a maximum validity of five (5) years, as well as the certificates of registry procedures whose duration will be of (3) years.

6.4 Activation data

6.4.1 Generation and Installation of Activation Data
As specified in CORPME Certification Practice Statement (CPS).

6.4.2 Activation data protection
As specified in CORPME Certification Practice Statement (CPS).

6.4.3 Other aspects of activation data
As specified in CORPME Certification Practice Statement (CPS).

6.5 Computer Security Controls

6.5.1 Specific technical security requirements
As specified in CORPME Certification Practice Statement (CPS).

6.5.2 Computer security assessment
As specified in CORPME Certification Practice Statement (CPS).

6.6 Lifecycle security controls

6.6.1 System Development Controls
As specified in CORPME Certification Practice Statement (CPS).

6.6.2 Security Management Controls
As specified in CORPME Certification Practice Statement (CPS).

6.6.3 Lifecycle Security Controls
As specified in CORPME Certification Practice Statement (CPS).

6.7 Network Security Controls
As specified in CORPME Certification Practice Statement (CPS).

6.8 Time Stamping
As specified in CORPME Certification Practice Statement (CPS).
7  CERTIFICATES, CRL AND OCSP PROFILES

7.1  Certificate Profile

7.1.1  Version Number

Certificates are electronically signed by CORPME with the private key corresponding to IN certificates class and are issued in accordance with the International Telecommunication Union standard, number X-509, version 3.

7.1.2  Certificate extensions

The extensions used in certificates are:

- Subject Key Identifier
- Authority Key Identifier
- Certificate Policies
- Basic Constraints
- Key Usage
- Extended Key Usage
- Subject Alternative Name
- CRL Distribution Points
- Authority Information Access (AIA)
- EU Qualified Certificate Extensions (EU-qualified)
  - Qualified Certificate Statements
  - QCSyntax v2
  - EU Qualified Certificate Policy Identifier

7.1.2.1  Registrar Qualified Certificate

These are the X.509 v3 certificate fields and extensions:

### CRL Distribution Points

1. **HTTP:**
   - http://pki.registradores.org/crls/crl_int_psc_corpme.crl
2. **LDAP:**
   - ldap://ldap.registradores.org/CN=AC INTERNA,
     O=Colegio%20de%20Registradores%20-%20Q2863012G,
class=cRLDistributionPoint

The latest versions of Microsoft CryptoAPI do not support either HTTPS or LDAPS. Therefore, the HTTP and LDAP protocols will be used.

### Authority Information Access (AIA)

- **Access Method:** id-ad-ocsp
- **Access Location:** http://ocsp.registradores.org/
- **Access Method:** id-ad-caissuers
- **Access Location** (AC Subordinada Interna):
  - http://pki.registradores.org/certificados/ac_int_psc_corpme.crt

The latest versions of Microsoft CryptoAPI do not support either HTTPS or LDAPS. Therefore, the HTTP and LDAP protocols will be used.

### Key Usage

- Digital Signature
- Non Repudiation
- Key Agreement

### Extended Key Usage

- clientAuth
- serverAuth

### Basic Constraints

- Subject Type=End Entity
- Path Length Constraint=None

### 7.1.2.5 Generic SSL Non-Qualified Certificate

These are the X.509 v3 certificate fields and extensions:

<table>
<thead>
<tr>
<th>Field / Extension</th>
<th>Content</th>
<th>Critical</th>
<th>Observations</th>
</tr>
</thead>
<tbody>
<tr>
<td>Version</td>
<td>v3</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Serial Number</td>

<td></td>
<td></td>
</tr>
<tr>
<td>Signature Algorithm</td>
<td>sha256WithRSAEncryption</td>
<td></td>
<td>OID: 1.2.840.113549.1.1.11 Norm PKCS#1 v2.1 y RFC 3447.</td>
</tr>
<tr>
<td>Issuer</td>
<td>C=ES, organizationIdentifier=VATES-Q2863012G, O=Colegio de Registradores de la Propiedad y Mercantiles, CN=Autoridad de Certificación de los Registradores – AC Interna</td>
<td></td>
<td>Matches the subject field of the Internal Subordinate CA certificate. All DirectoryString encoded in UTF8. The &quot;C&quot; (countryName) attribute will be encoded according to &quot;ISO 3166-1-alpha-2 code elements&quot;, in PrintableString</td>
</tr>
</tbody>
</table>
## CORPME INTERNAL CERTIFICATION POLICIES

<table>
<thead>
<tr>
<th>Validity</th>
<th>5 years</th>
</tr>
</thead>
<tbody>
<tr>
<td>Subject</td>
<td>As defined in section 3.1.1.5</td>
</tr>
</tbody>
</table>
| Subject Public Key | Algorithm: RSA Encryption  
Length: 2048 bits |
| Subject Key Identifier | Function hash sha1 for the subject public key | NO |
| Authority Key Identifier | Function hash sha1 for the AC public key issuer | NO |
| Certificate Policies | It will be used |
| - Policy Identifier | 1.3.6.1.4.1.17276.0.1.6.2 |
| - Policy Qualifier Info | NO |
| - Policy Qualifier Id (CPS) | http://pki.registradores.org/ normativa/index.htm |
| - Policy Qualifier Id (User Notice) | Certificado No Cualificado de SSL Genérico, sujeto a la Declaración de Prácticas de Certificación del Colegio de Registradores de la Propiedad y Mercantiles de España (© 2016) |
| Subject Alternative Name | Rfc822Name = correo_responsable@domain.com  
DNSName = al menos el nombre DNS del CN así como otros nombres DNS |
| CRL Distribution Points | NO |
| (1) HTTP | http://pki.registradores.org/crls/crl_int_psc_corpme.crt |
| (2) LDAP | ldap://ldap.registradores.org/  
CN=AC%20INTERNA, O=Colegio%20de%20Registradores%20-%200Q2863012G, G=ES?certificateRevocationList?base ?object class=cRDLDistributionPoint |
| 8. Authority Information Access (AIA) | NO |
| Access Method: id-ad-ocsp | NO |
| Access Method: id-ad-calsuers | The latest versions of Microsoft CryptoAPI do not support either HTTPS or LDAPS. Therefore, the HTTP and LDAP protocols will be used. |
| Key Usage | Digital Signature  
Key Encipherment  
Key Agreement |
| YES | YES |
7.1.3 Object identifiers (OID) of algorithms
Cryptographic algorithms Object Identifier (OID): 1.3.6.1.4.1.17276.0.1.0.1.0

7.1.4 Name format
External certificates contain the X.500 distinguished issuer name and certificate holder in the issuer name and subject name fields respectively.

7.1.5 Name Restrictions
The name restrictions are described in section 3.1.1 of this document.

7.1.6 Certification Policy Object Identifier (OID)
The OIDs for this CP are as follows:
- Registrar Qualified Certificates: 1.3.6.1.4.1.17276.0.1.1.2
- Internal Personnel Qualified Certificates: 1.3.6.1.4.1.17276.0.1.2.2
- Qualified Certificates of Legal Person Representative for Electronic Invoicing: 1.3.6.1.4.1.17276.0.1.4.1
- Non-Qualified Certificates for Registration Procedures: 1.3.6.1.4.1.17276.0.1.3.2
- Generic SSL Non-Qualified Certificates: 1.3.6.1.4.1.17276.0.1.6.2

7.1.7 Using the extension ”PolicyConstraints”
Not stipulated.

7.1.8 “Syntax of the ”PolicyQualifier”
The Certificate Policies extension contents can be found in section 7.1.2 of this document.

7.1.9 Semantic processing for critical extension “Certificate Policy”
Not stipulated.

7.2 CRL Profile

7.2.1 Version Number
As specified in CORPME Certification Practice Statement (CPS).

7.2.2 CRL and extensions
As specified in CORPME Certification Practice Statement (CPS).

7.3 OCSP Profile

7.3.1 Version Number(s)
As specified in CORPME Certification Practice Statement (CPS).

7.3.2 OCSP Extension
As specified in CORPME Certification Practice Statement (CPS).
8 COMPLIANCE AUDITS AND OTHER CONTROLS

8.1 Frequency or circumstances of controls for each Authority
As specified in CORPME Certification Practice Statement (CPS).

8.2 Auditor Identification / Qualification
As specified in CORPME Certification Practice Statement (CPS).

8.3 Relationship between auditor and Audited Authority
As specified in CORPME Certification Practice Statement (CPS).

8.4 Aspects covered by controls
As specified in CORPME Certification Practice Statement (CPS).

8.5 Actions to be taken because of deficiencies detection
As specified in CORPME Certification Practice Statement (CPS).

8.6 Communication of results
As specified in CORPME Certification Practice Statement (CPS).
9 OTHER LEGAL AND ACTIVITY ISSUES

9.1 Rates

9.1.1 Certificate or renewal rates
As specified in CORPME Certification Practice Statement (CPS).

9.1.2 Certificate access fees
As specified in CORPME Certification Practice Statement (CPS).

9.1.3 Access fees to the information status or revocation
As specified in CORPME Certification Practice Statement (CPS).

9.1.4 Other service rates
As specified in CORPME Certification Practice Statement (CPS).

9.1.5 Refund Policy
As specified in CORPME Certification Practice Statement (CPS).

9.2 Economic Responsibilities
As specified in CORPME Certification Practice Statement (CPS).

9.3 Confidentiality of information
As specified in CORPME Certification Practice Statement (CPS).

9.3.1 Confidential information scopes
As specified in CORPME Certification Practice Statement (CPS).

9.3.2 Non confidential information
As specified in CORPME Certification Practice Statement (CPS).

9.3.3 Professional Secrecy Duty
As specified in CORPME Certification Practice Statement (CPS).
9.4 Personal Information Protection
As specified in CORPME Certification Practice Statement (CPS).

9.5 Intellectual Property Rights
As specified in CORPME Certification Practice Statement (CPS).

9.6 Representation and Warranties

9.6.1 CA’s Obligations
As specified in CORPME Certification Practice Statement (CPS).

9.6.2 RA’s Obligations
As specified in CORPME Certification Practice Statement (CPS).

9.6.3 License holders obligation
As specified in CORPME Certification Practice Statement (CPS).

9.6.4 Obligations of third parties who trust or accept certificates
As specified in CORPME Certification Practice Statement (CPS).

9.6.5 Other participant obligations
As specified in CORPME Certification Practice Statement (CPS).

9.7 Disclaimer
As specified in CORPME Certification Practice Statement (CPS).

9.8 Limitations of Responsibilities
As specified in CORPME Certification Practice Statement (CPS).

9.9 Indemnification
As specified in CORPME Certification Practice Statement (CPS).
9.10 Validity Period

9.10.1 Time Limit
This CP will come into effect from the moment of its publication in the CORPME’s web directory and will be in force as long as it is not expressly waived by the issuance of a new version.

9.10.2 CP Replacement and repeal
This CP will be replaced by a new version regardless of the significance of the changes made in it, so that it will always be fully applicable.
When the CP is revoked, it will be removed from the CORPME web directory, although it will be kept for fifteen (15) years.

9.10.3 Completion Effects
The obligations and restrictions established by this CP, in reference to audits, confidential information, obligations and responsibilities of the CORPME TSP, born under its validity, will survive after its replacement or repeal by a new version in everything in which it does not oppose this one.

9.11 Individual notifications and communications with participants
As specified in CORPME Certification Practice Statement (CPS).

9.12 Specifications Changes Procedures

9.12.1 Changes Procedures
As specified in CORPME Certification Practice Statement (CPS).

9.12.2 Circumstances in which OID must be changed
As specified in CORPME Certification Practice Statement (CPS).

9.13 Claims
As specified in CORPME Certification Practice Statement (CPS).

9.14 Applicable regulations
As specified in CORPME Certification Practice Statement (CPS).

9.14.1 Compliance with applicable regulations
As specified in CORPME Certification Practice Statement (CPS).

**9.15 Various Stipulations**

**9.15.1 Full Acceptance Clause**
As specified in CORPME Certification Practice Statement (CPS).

**9.15.2 Independence**
In the event that one or more stipulations of this CP are or become invalid, or legally unenforceable, shall be understood as not being established, unless such provisions were essential so that excluding them from the CP would not be effective.

**9.15.3 Judicial resolution**
As specified in CORPME Certification Practice Statement (CPS).

**9.16 Other Stipulations**
Not stipulated.
